EXPERIENCE

U.S. Fish and Wildlife Service, Gulf Restoration Office Spatial Ecologist, Project Manager

August 2022 - Present

- Manage \$72 million North Breton Island Restoration Project, directing barrier island habitat restoration and monitoring to support nearshore shorebird and seabird breeding populations on the Gulf coast
- Maintain custom Project Ledger database system to track, query, and report spatial and tabular information on 680+ restoration projects representing \$8.8 billion in Deepwater Horizon oil spill settlement funding
- Create geospatial data visualizations for leadership and public audiences, including basemaps for the Deepwater Horizon oil spill settlement Programmatic Review and Esri web maps that informed Inflation Reduction Act funding allocation decisions
- Lead 50+ member Spatial Analysis working group within the U.S. Fish and Wildlife Service's Southeast Region GIS Community of Practice, increasing practitioner capacity and innovation through monthly webinars and workshops

The University of Alabama Graduate Teaching Assistant: Geography 101

August 2021 - May 2022

- Delivered curriculum for 10 laboratory classes on atmospheric patterns and processes, including case studies and collaborative assignments that served over 60 undergraduate students across three lab sections per semester

U.S. Fish and Wildlife Service Directorate Fellowship Program Gulf Restoration Office Fellow

May 2021 - August 2021

- Integrated over 10 data layers into a risk assessment map analyzing chemical threats to Endangered Species Act-listed species across the Southeast US, providing decision support for conservation planning and risk mitigation
- Produced web mapping applications, static maps, a project report, and a StoryMap to document and share project products with restoration practitioners and wildlife biologists

EDUCATION

The University of Alabama

- Master of Science in Geography 2022
- Bachelor of Science in Biology 2018
- Bachelor of Arts in English

SKILLS

Technologies: Esri tools (ArcGIS Pro and Online), QGIS, Python, R, Microsoft Access, PowerBI, and SharePoint

Skills: Spatial and tabular data validation, analysis, visualization; project and team management

Languages: Fluent in Spanish, basic French

Interests: Reading fiction, hiking Alabama's protected lands, fly fishing, knitting garments
